Thanks for that comment Carol. I added a bit to make that distinction below.

We're still waiting on the meeting minutes from Liza, then Sandra will share this response with SFIREG. Thanks!

Yes, that's how I understand it as well.

So you are okay with us sharing these comments with SFIREG?

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5 Do I have that right? That wasn't clear to me on the call.

Carol

Hi Carol,

Thanks for asking, we think it'd be best to send your questions to the group at large so we're on in the communication loop. I'll also setup a meeting for OPP and OECA to discuss the bulletin printing issue. Below, I'm providing the info. on the ESA buffers that was relied on today's call:

Deliberative Process / Ex. 5

Subject: Evaluating compliance with dicamba ESA requirements

Hi Sandra and Enid,
I have a couple of questions following up on the dicamba call, (which I joined about half way through):

- Since the printing of the bulletins live issue has been identified as a significant concern for the SLAs on the last two dicamba calls, I'd like to raise my questions below again internally. Should I resend my message to the original To: group or is there a better way to get this issue resolved? Your thoughts?
- Will/would you share with OECA the information on ESA and buffers before you finalize it?

Thanks!!

Carol

Subject: RE: Evaluating compliance with dicamba ESA requirements

Following up on the discussion we had last week, there seems to be one loose end. We saw that the Bulletins Live! website directions include a directive to print out the information, however there are no instructions about retaining the print out for a period of time.

To enhance the ability of inspectors to determine compliance, we should add to the directions on the Bulletins Live! website, the requirement to retain the record for a specific period of time. So, two questions for the group:

1. Can we require applicators to retain the printed information? How long should we require applicators to keep these records?
2. How difficult is it to change the directions on Bulletins Live!? If the decision is made to make this change, when could/should this change happen given we are in the middle of the growing season?

Please reply to all, and we can see if another meeting would be helpful, or if an email exchange will do it.

Thanks for your time and attention to clarifying this issue.
